

In-App Advertising is Revolutionizing the Way Brands Engage their Audience

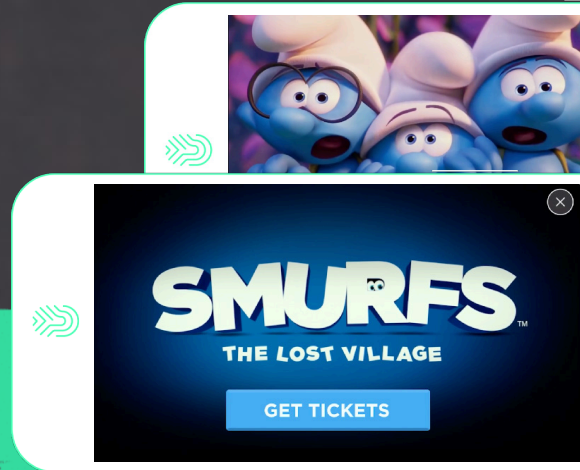

STAY AHEAD OF THE CURVE

The market is now mobile and users are spending the majority of their digital time in mobile apps.

In-App Engagement is a Preferred Pastime

Japanese adults spend an average of 22 minutes per day using mobile apps.

Source: Average Time Spent on Mobile Apps in Asia: TNS, Google, Statista 2016

Users spend an average of 1-2 minutes to download an app

On average, each user engages with 7 apps daily,* which are comprised of digital music, social networking, m-commerce, messaging and most importantly, gaming apps.

*Statista: Average number of mobile apps used per day by users in the United States, 2016

In-App Advertising is Revolutionizing the Way Brands Engage their Audience

STAY AHEAD OF THE CURVE

Mobile apps are a brand safe environment where users opt-in to engage with relevant full screen, content on their most personal device.

Apple and Google apply rigorous criteria to every app verified and accepted to their app store, ensuring brand safety.

70% of mobile users play mobile games. This figure will grow to 81% by 2020.

A Mobile Gaming Strategy is a Must

Gaming has the most time spent out of any app category, including social apps.

It is the only environment where you can reach a massive audience that is focused and engaged.
